Metal separator M-Pulse2 / Digital2 / MESEP

SE

Application

This type of separators is used for various applications in the plastics and the chemical industry. All important components of the SE are made of stable die-cast aluminium. Due to this the separator is indestructible and guarantees durability and longevity even under adverse conditions.

Metal separator SE

Function

In the upper part of the separator the sensor coil of the metal detector is situated. If metal falls through the sensor the signal is collected and processed by the operating electronics. Subsequently the electronics precisely excites the pulse for piloting the ejection flap. The flap is opened and metal is separated safely from the product stream. The robust, pneumatic driven mechanics guarantees durability. The function of the mechanics can be monitored constantly by several alerter. Thus the device constantly ensures that all metallic pieces have really been separated from the product stream.

Specific characteristics

- maintenance-free mechanics
- different transmission ports available
- robust, pneumatic-driven ejection mechanics
- large range of accessories available
- all devices are mechanically compatible
- compact design

Metal separator SE

Type	SE 35	SE 50	SE 70	SE 100
Mechanical data				
Heighth	365,5 mm (400 mm with flange)			
Sensor aperture - D model MESEP SE	29 mm	45 mm	65 mm	94 mm
Sensor aperture - D model Digital2 SE model M-Pulse2 SE	29 mm	45 mm	65 mm	not available
Material-ejection flap	stainless steel			
Material-base frame	cast aluminium / stainless steel			
Material-protection tube ²	phenolic resin			
Payload	max. 150 kg			
Weigth	~ 21 kg			
Conditions of use				
Storage temperature	-10 .. 60°C			
Operating temperature	0 .. 60°C			
Protection class	IP50			
Electrical connection	see datasheet of the control units			
Pneumatic connection	4-6 bar, filtered, from of water and oil; self-sealing-coupling - fitting NW 7,2			
max. drop heighth of the bulk material	0 .. 600 mm (from top edge)			
Troughput ³	600 l/h	2.000 l/h	5.400 l/h	14.000 l/h
Sensitivity¹				
Material - test pieces ⁴	FE	SS	FE	SS
M-Pulse2	0,2	0,5	0,3	0,7
Digital2	0,3	0,6	0,35	0,9
MESEP	0,5	0,8	0,6	1,2
			FE	SS
			0,5	1,0
			1,1	1,5
			1,3	2,0

Order code:

Electronic

M-Pulse2 / Digital2

Type of seperator

SE 35 - SE 100

(e.g.: Digital2 SE 70)

¹ The actual sensitivity depends on various factors. Unfavourable environmental conditions or vibrations can reduce the sensibility. Conductive test material can also influence the sensibility. For obliging information please contact our service or sales department. Our service includes product tests in our headquarters. (all data in mm)

² Other materials available. (glas, antistatic; wear-resistant)

³ Measured with granulate PET - grain dimension 2 - 4 mm.

⁴ FE → Ferrous / SS → Stainless steel

Pulsotronic-Anlagentechnik GmbH

Special design & accessories

Designation	Order number
Voltage- und pneumatic guard (Flap automatic switchs into throw-off position at blackout or falling pressure)	When ordering please add option 40.
Wear-resistant model (for very abrasive bulk material)	When ordering please add option 44.
Test pieces - certified - Fe/NonFe/SS (several diameters)	on request

Application example

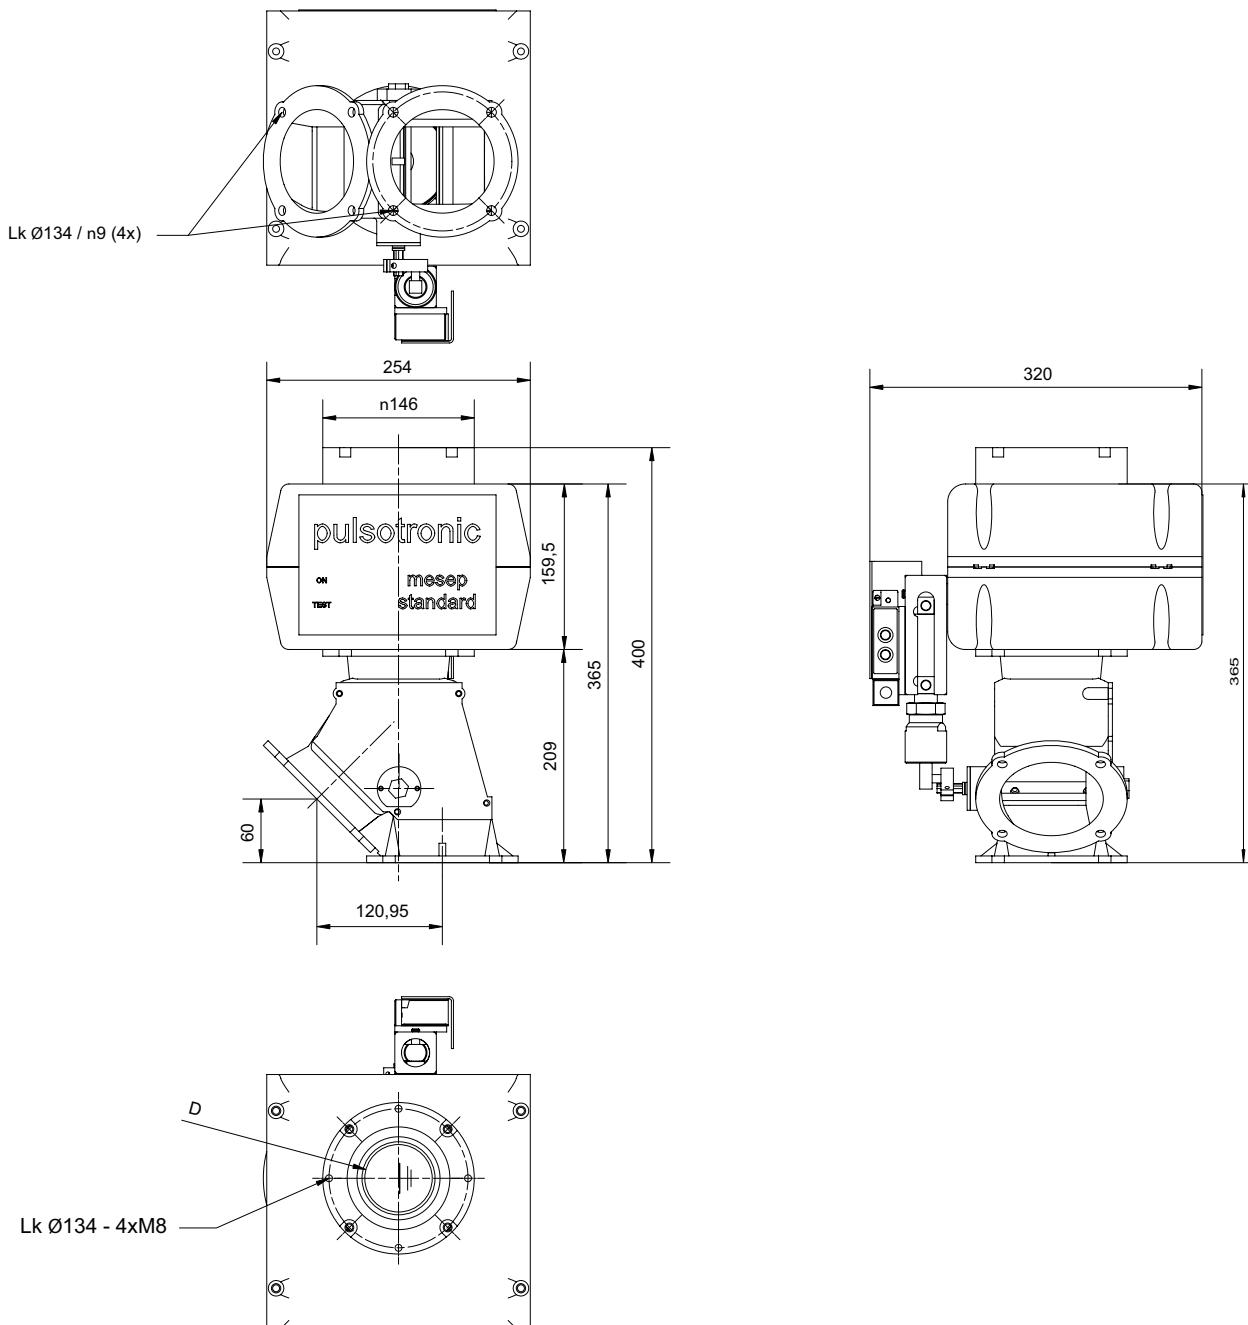

MESEP SE 50 for the inspection of granulates in the plastics industry.

Metal separator SE

Metal separator SE

Dimensions

Devices with the operating electronics M-Pulse2 or Digital2 request an external control electronics which is connected via a 1.5 m connecting cable with the separator. The dimensions of the electronics are given in the particular data sheets.
